

Castle Guidelines

As part of our Medieval Times Unit you will be constructing a castle with your group. This is a project that you will work on when you finish the other required individual choice activities. Make sure you research and look at many pictures of castles, so that your construction looks like a true Medieval Times replica. The following are the guidelines that you must follow with your group:

1. The maximum size of the base may be NO LARGER than the top of one student desk.
2. The highest point of your castle may be NO TALLER than one and a half feet.
3. The castle should look like a real Medieval Times castle.
4. You need to have a drawn out paper and pencil plan before you start building.
5. Materials used to construct the castle should be recycled goods:
For example: paper towel tubes, toilet paper tubes, cereal boxes, small cans, plastic bottles, egg cartons, jars, popsicle sticks, scrap wood pieces, etc. BE CREATIVE!
6. All your materials need to be kept in a neat pile in the room on the base of your castle. Materials that are not kept by your castle will be recycled.
7. If we have time, it would be fun to paint them as well.

* Students who do not complete the required torture chamber choice activities by the due date of May 26 will not be allowed to join a castle group and will continue the original choice work along with additional written work related to the Medieval Times.
